

LOW PRESSURE CENTRIFUGAL FANS CBM Small Series

CBM/4-180/092-160 W
230V50/60HZ VE

Range of single and double inlet direct driven low pressure centrifugal fans manufactured from galvanised sheet steel and protected against corrosion by a black polyester paint coating.

All the models are fitted with forward curved centrifugal impellers manufactured from galvanized sheet steel. Available, depending upon the model, with single phase motors in 2, 4 or 6 poles.

Motors

All motors are IP44, Class B, equipped with thermal protection and ball bearings greased for life.

Electrical supply:

-Single phase 230V-50Hz.

External rotor motor.

Speed controllable by Voltage.

On request

Coupling flange fitted at the fan outlet.

+ Attributes

Compact design

Special design of the whole assembly Motor over Impeller which provides a compact size specially in single inlet models

Impeller dynamically balanced

Impeller dynamically balanced, according to ISO 1940 standard, providing vibration free operation
